

Stronger together:

BioVendor Group enters a new era

Focused on innovation.
Committed to you.

Bringing expertise together as one

Three global divisions, a unified brand identity, closer integration of research, operations, and customer support – the new model brings faster innovation, greater reliability, and stronger partnerships for laboratories and patients.

Driving innovation, strengthening support

More value for your business, more trust for your customers

Faster innovation

Reliable diagnostics (IVDR included)

Stronger collaboration

One trusted partner

One brand, one identity

BioVendor[®]
Group

Under this transformation, BioVendor Group becomes the unifying brand across all markets and communication channels.

For regulatory reasons, established company names such as TestLine, ViennaLab and DiaSource remain visible on product packaging as legal manufacturers.

Strong vision for better diagnostics

At the core of this transformation lies a renewed vision:

To be the trusted innovator in specialty clinical diagnostics, transforming patient needs into advanced solutions for better care and more effective healthcare systems.

This vision expresses our ambition and enduring commitment to science, partnership, and better care through diagnostics. With this transformation, we are ready to advance diagnostics with you, our partners.

About BioVendor Group

We are an international group of biotechnology companies with expertise in immunodiagnostics, molecular diagnostics, and radio-immunodiagnostics. Founded in 1992 in the Czech Republic, we have grown from a local company into a global innovator with in-house research, development, and production of *in-vitro* diagnostic (IVD) products, supported by an international distribution network.

Our strategy is anchored by three key projects – CLIA, MBA, and NGS – focusing our innovation and delivery across next-generation sequencing, chemiluminescent immunoassays, and Microblot-Array. By combining scientific excellence, strong innovation capacity, and a presence in more than 100 markets worldwide, we deliver solutions that advance laboratory practice and patient care, making us one of the key players in clinical diagnostics.

We are ready to stand by your side
